
Superstore Sales Report.

Authored by: SANA ANAS M

1. Project Overview

Name: Superstore Sales Performance Analysis

Objective: To analyse sales performance, profit trends, and customer segments across different regions and categories.

The goal is to identify key revenue drivers, unprofitable products, and opportunities to improve business strategy.

2. Dataset Summary

- **Rows:** ~9,000
- **Columns:** 13
- **Key Fields:** Order ID, Order Date, Ship Date, Customer Name, Segment, Region, State, Category, Sub-Category, Sales, Quantity, Profit.
- **Data Source:** Sample Superstore Dataset (CSV from Kaggle / Power BI sample).

Cleaning Steps:

- Removed duplicate Order IDs.
 - Checked and corrected date formats (Order Date / Ship Date).
 - Created calculated columns for *Profit*, *Sales per Order*, and *Days to Ship*.
-

3. Column-wise Assessment Summary

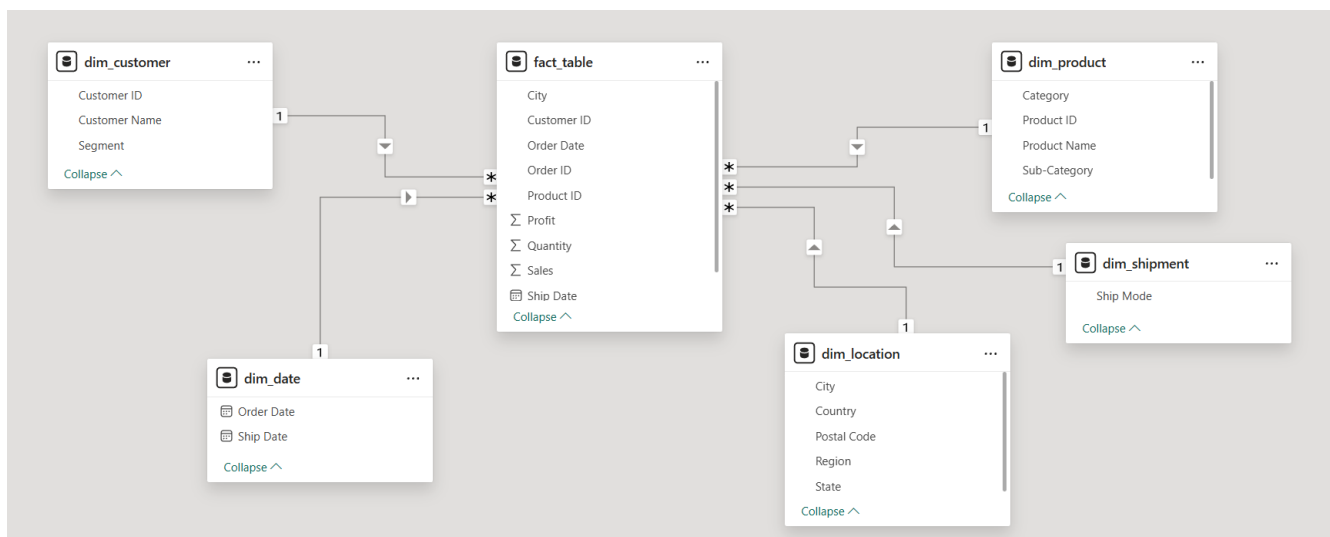

Column	Description	Findings
Order ID	Unique identifier for each order	No duplicates
Order Date / Ship Date	Order and shipment timelines	All valid dates
Customer Name	Customer details	700+ unique customers
Segment	Customer type	3 Segments: Consumer, Corporate, Home Office
Category / Sub-Category	Product classification	3 Categories, 17 Sub-categories
Sales / Profit	Key performance metrics	Some products show negative profit
Region / State / City	Geographical fields	4 Regions (Central, East, South, West)

	A	B	C	D	E	F	G
1	Column Name	Data Type	Non-null Count	Missing Count (%)	Unique Values	Most Frequent Value	Notes / Cleaning Needed
2	Order ID	Text	9995	0	226	Varies	Keep as text (ID contains letters)
3	Order Date	Date	9995	0	133	Varies	Convert to Date format (DD-MM-YYYY)
4	Ship Date	Date	9995	0	152	Varies	Convert to Date format (DD-MM-YYYY)
5	Ship Mode	Text	9995	0	4	Standard Class	No cleaning needed
6	Customer ID	Text	9995	0	120	Varies	Keep as text (Identifier)
7	Customer Name	Text	9995	0	120	Varies	No cleaning needed
8	Segment	Text	9995	0	3	Consumer	No cleaning needed
9	Country	Text	9995	0	1	United States	No cleaning needed
10	City	Text	9995	0	45	New York	No cleaning needed
11	State	Text	9995	0	2	California	No cleaning needed
12	Postal Code	Whole Number	9995	0	54	90036	Check for leading zeros → If lost, convert to Text
13	Region	Text	9995	0	4	West	No cleaning needed
14	Product ID	Text	9995	0	568	Varies	Keep as text (ID contains letters)
15	Category	Text	9995	0	3	Office Supplies	No cleaning needed
16	Sub-Category	Text	9995	0	17	Binders	No cleaning needed
17	Product Name	Text	9995	0	568	Varies	No cleaning needed
18	Sales	Decimal Number	9995	0	831	20 (approx)	Ensure numeric format (Currency)
19	Quantity	Whole Number	9995	0	14		2 No cleaning needed
20	Profit	Decimal Number	9995	0	894	5 (approx)	Keep negative values (represents loss)
21							

4. Data Model Overview

Relationships:

- Orders[Customer ID] → Customers[Customer ID] (*One-to-Many*)
- Orders[Product ID] → Products[Product ID] (*One-to-Many*)
- Orders[Order ID] → Time[Order ID] (*One-to-Many*)
- Orders[Region] → Regions[Region] (*One-to-Many*)

5. Analysis & Insights

- **Top Performing Category:** Technology contributes the highest sales and profit.
 - **Least Profitable Sub-category:** Tables and Bookcases show frequent losses.
 - **Regional Trend:** The West region has the highest profit margin, while the South shows more discount-driven losses.
 - **Customer Segment:** Consumers generate most orders, but Corporate has higher average order value.
 - **Shipping:** Second Class and Standard Class are the most used shipping modes.
-

6. Conclusions

- Profitability varies by product sub-category and discount strategy.
 - Reducing discounts on low-margin furniture could improve profitability.
 - Technology category and West region are strong revenue contributors.
-

7. Recommendations

- Focus on **Technology** and **Office Supplies** products with high ROI.
 - Re-evaluate discount policies for **Furniture** items.
 - Increase marketing efforts in **Central and South regions**.
 - Improve delivery speed for better customer satisfaction.
 - Create customer loyalty programs for high-value customers.
-

8. Dashboard Overview

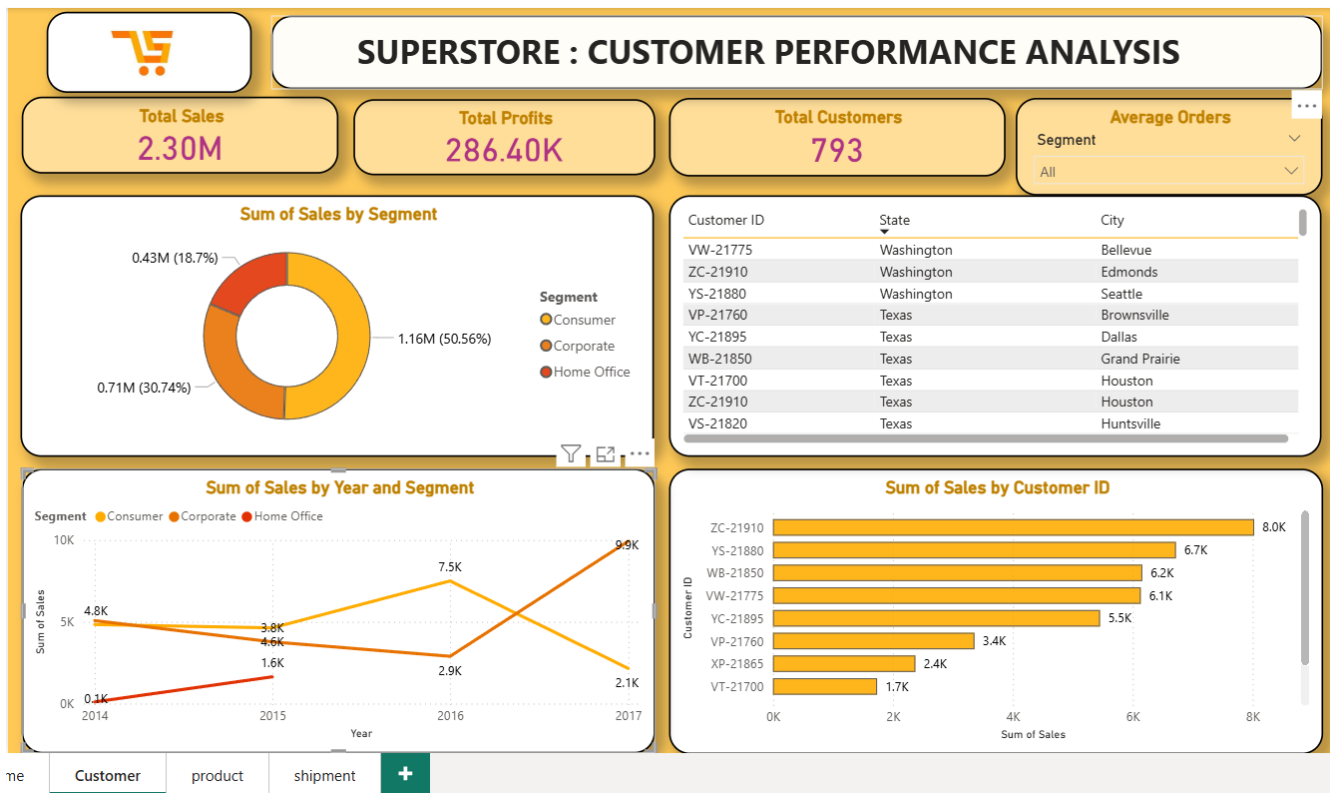

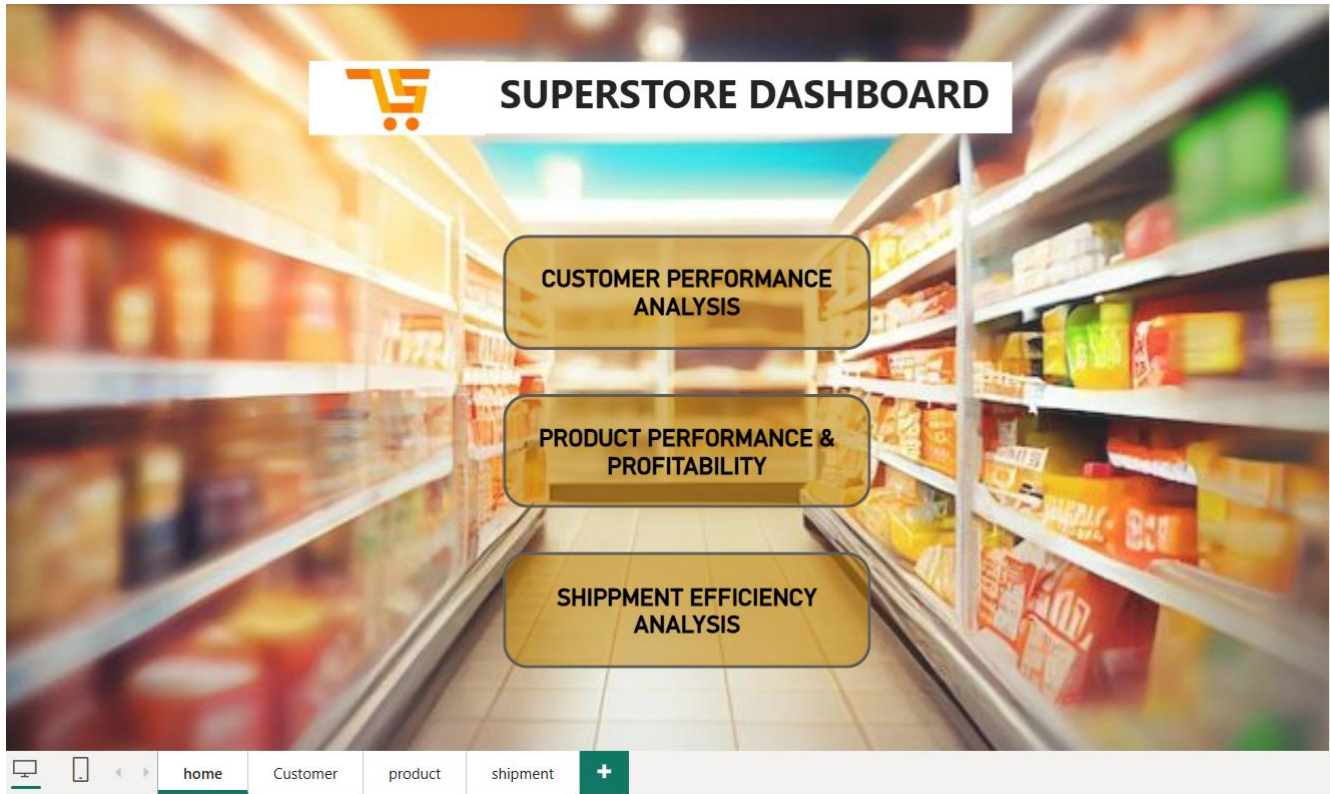

Dashboard Includes:

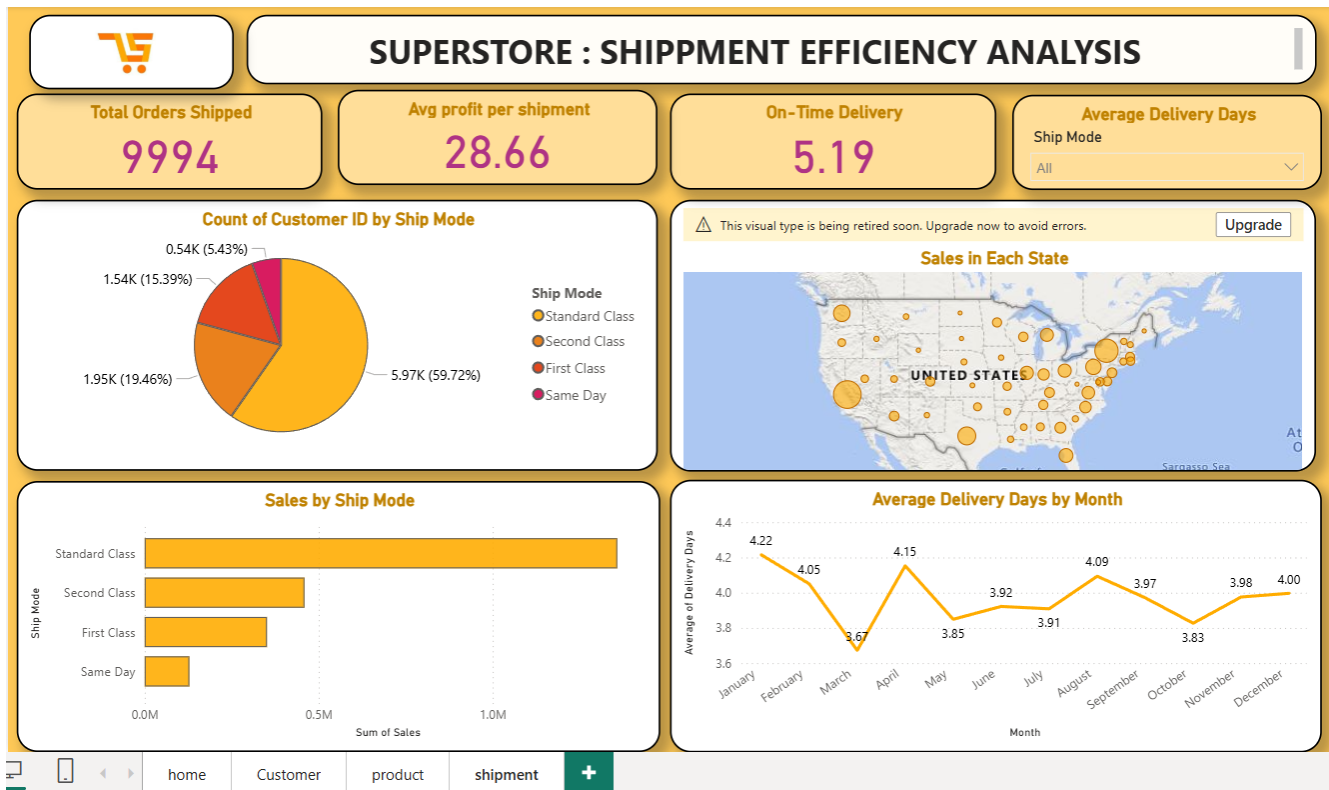

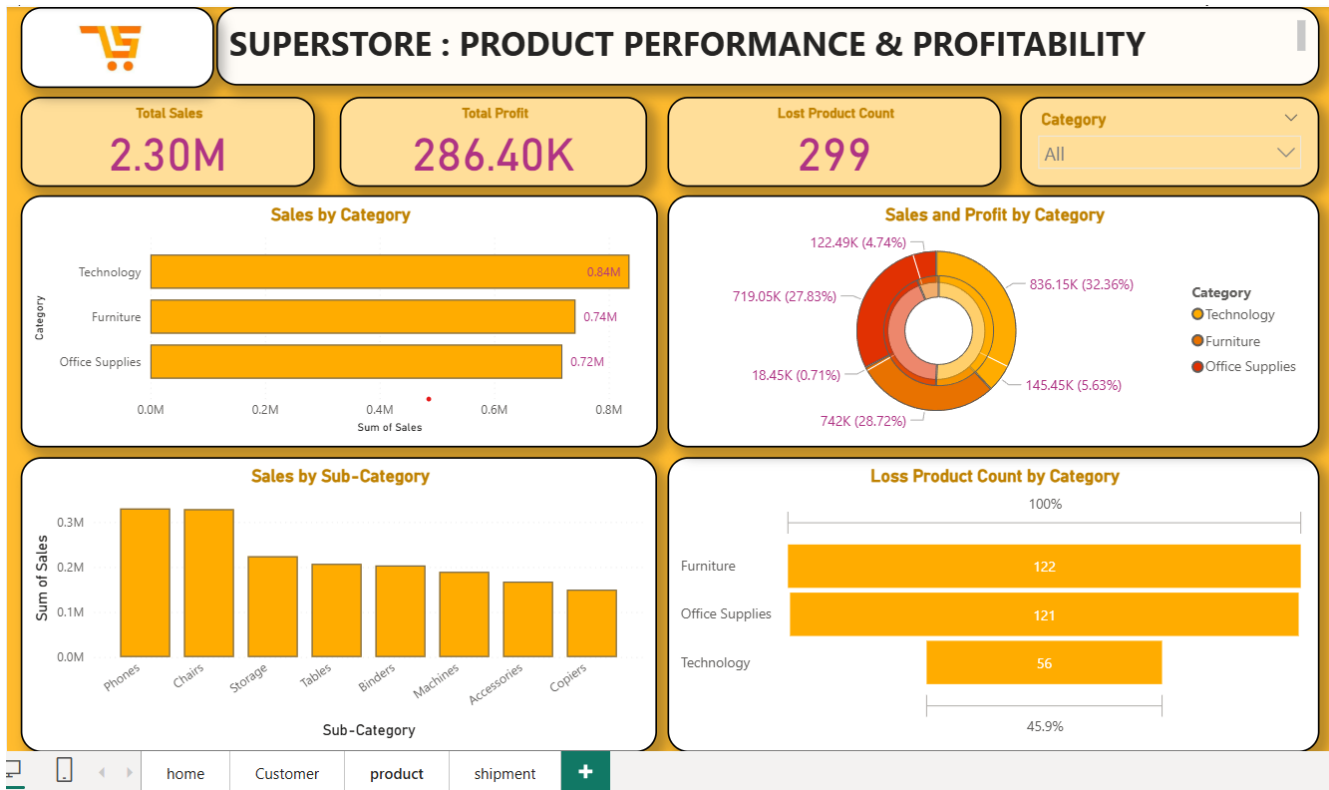

KPIs are:

- Total Sales
- Total Profit
- Total Customer
- Average Order Value
- Lost Product Count
- Total Orders Shipment
- On –Time Delivery
- Avg Profit per Shipment

Charts are:

- Bar Chart: Sales by Category
- Donut Chart: Segment Breakdown
- Line Chart: Monthly Sales Trend, Sum of Sales by Year
- Table: Top Performing Products
- Pie chart: Count of Customer ID by Shipmode
- Map Chart: Sales in Each State
- Funnel Chart: loss Product Count by Category

9. Notes / Limitations

- Dataset limited to a single year's sales; does not include returns or refunds.
 - Profit may vary due to applied discounts not detailed in dataset.
 - Some cities have incomplete postal data.
-
